

Arab American Heritage Month Bulletin Board

April is "Arab American Heritage Month", a month dedicated to celebrating the history, culture, diversity, and significant contributions made by Arab Americans in the United States.

The initiative for the official national designation of Arab American Heritage Month was launched in 2017 by the nonprofit organization Arab American Foundation and its sister organization Arab America. It began with support from only a few states and has gained more support with each passing year.

On April 19, 2021, Arab America and the Arab America Foundation received a letter responding to an invitation they sent President Joe Biden, in which he congratulated them on the celebration of National Arab American Heritage Month.

On April 1, 2022, the State Department issued a statement designating April as Arab American Heritage Month. Shortly after, President Biden tweeted *"The history and story of the Arab American community is deeply woven into the diverse tapestry of America. This National Arab American Heritage Month, I thank the community for all that you have done to help move us forward and for representing the best of who we are."*

This was the first time a US president publicly validated and commemorated National Arab American Heritage Month. It now has support from the U.S. Department of State and 45 state governors. Additionally, Illinois, Oregon, Virginia, and Indiana have passed permanent legislation designating April as National Arab American Heritage Month (AAHM).

On March 31, 2023, President Joe Biden issued the first-ever Proclamation recognizing National Arab American Heritage Month.

"The Arab American story is the American story — one of diverse backgrounds and faiths, vibrant tradition, bold innovation, hard work, commitment to community, and stalwart patriotism, all coming together to accomplish something greater than any one of us. This month, we join together to celebrate the immeasurable contributions of Arab Americans to our Nation and recommit ourselves to the timeless work of making sure that all people have the opportunity to achieve the American Dream.

Ours is a Nation shaped by the immigrant's heart, and generations of brave and hopeful people from across all countries, including from the Arab world, have woven their unique heritages, customs, and talents into the tapestry of America. Today, the achievements of Arab Americans are reflected in the arts and sciences; in businesses and faith communities; in classrooms and hospitals; and in police stations, firehouses, and every branch of the military. Arab Americans are also proudly serving throughout my Administration, bringing a diversity of expertise that helps make this country stronger, more prosperous, and more just.

This Arab American Heritage Month, let us all strive to honor our fundamental values and advance equity and opportunity for all people, affirming once again that diversity is our country's greatest strength."

A Proclamation on Arab American Heritage Month

President Joe Biden

March 31, 2023

www.whitehouse.gov

"Arab Americans are a diverse community of immigrants and the descendants of immigrants 3.7 million strong, who have come from throughout the Arab world. We are Syrians, Lebanese, Egyptians, Palestinians, Iraqis, Jordanians, and Yemenis—from North Africa to Southwest Asia. Our ethnic community is diverse in faith, race, sexual orientation, gender identity, and ability."

The story of Arab Americans is the story of America. Our history illustrates how the immigrant experience has shaped our country, and how, by engaging fully in civic life, we can bring about meaningful change towards the democratic ideals of equality, justice, and inclusion. "

Arab American Institute
www.aaiusa.org

63% of Arab Americans are Christian and 24% are Muslim.

Ramadan is considered one of the holiest months of the year for Muslims. In Ramadan, Muslims commemorate the revelation of the Qur'an, and fast from food and drink from pre-dawn to sunset, a fast of between 11-16 hours depending on the time of year for a period of 29-30 days.

Ramadan is the 9th month of the Islamic calendar, which is based on a 12 month lunar year of approximately 354 days. Because the lunar year is 11 days shorter than the solar year, each lunar month moves 11 days earlier each year. The month traditionally begins and ends based on the sighting of the new moon.

Ramadan is a month of intense spiritual rejuvenation with a heightened focus on devotion, during which Muslims spend extra time reading the Qur'an and performing special prayers. Those unable to fast, such as pregnant or nursing women, the sick, or elderly people and children, are exempt from fasting.

The ultimate goal of fasting is gaining greater God-consciousness, in Arabic, taqwa, signifying a state of constant awareness of God. From this awareness a person should gain discipline, self-restraint and a greater incentive to do good and avoid wrong, including negative acts such as gossiping, backbiting, lying or arguing. Muslims welcome Ramadan as an opportunity for self-reflection, and spiritual improvement, and as a means to grow in moral excellence. Ramadan cultivates gratitude, and compassion for those less fortunate.

Ramadan is also a highly social time as Muslims invite each other to break their fast together and meet for prayers at the mosque.

Dr. Mona Hanna-Attisha

- ◆ **Pediatrician, Scientist, Activist, Author, and Professor**
- ◆ **Founder and Director of the Michigan State University and Hurley Children's Hospital Pediatric Public Health Initiative**
- ◆ **Uncovered the Flint Water Crisis in Flint, MI, and Led the Recovery Efforts**

“Challenging injustice means standing up for the weak, the vulnerable, the abused, and the forgotten -- be it in health, employment, education, or the environment.”

***"As the guardians
of health, we can't
look away."***

- Dr. Mona Hanna-Attisha

***"There is Flint
everywhere. Find
something that you're
passionate about, that
you care about, and put
your energy and
resources into something
in your own backyard.
There's a lot that you can
do wherever you are."***

- Dr. Mona Hanna-Attisha

"If we stop believing that government can protect our public welfare and keep all children safe, not just the privileged ones, what do we have left? Who are we as a people, a society, a country, and a civilization?"

- Dr. Mona Hanna-Attisha

***"There's a lot you
can do wherever
you are."***

- Dr. Mona Hanna-Attisha

***"To expect resilience
without justice is
simply to
indifferently accept
the status quo."***

- Dr. Mona Hanna-Attisha

***"The world shouldn't
be comprised of
people in boxes.
Minding their own
business. It should be
full of people raising
their voices, using their
power and presence,
standing up for what's
right."***

- Dr. Mona Hanna-Attisha

"Surviving life's hardest blows should not be celebrated — or expected. Recovery and reconciliation require reparations and resources. To expect resilience without justice is simply to indifferently accept the status quo.... Rather than hoping a child is tough enough to endure the insurmountable, we must build resilient places — healthier, safer, more nurturing and just — where all children can thrive."

- Dr. Mona Hanna-Attisha

***"We march for
science so that
scientists have the
freedom, like I did,
to speak out and
to continue to
make the world a
better place."***

- Dr. Mona Hanna-Attisha

Dr. Mona Hanna-Attisha

Mona Hanna-Attisha, MD, MPH, FAAP, is founder and director of the Michigan State University and Hurley Children's Hospital Pediatric Public Health Initiative, an innovative and model public health program in Flint, Michigan.

A pediatrician, scientist, activist and author, Dr. Hanna-Attisha has testified four times before the United States Congress and was awarded the Freedom of Expression Courage Award by PEN America. She was named one of Time magazine's 100 Most Influential People in the World and recognized as one of USA Today's Women of the Century for her role in uncovering the Flint water crisis and leading recovery efforts, and most recently, received the 2020 CDC Foundation's Fries Prize for Improving Health.

A frequent contributor to national media outlets, including the New York Times and Washington Post, Dr. Hanna-Attisha has appeared on CNN, MSNBC, BBC and countless other outlets championing the cause of children in Flint and beyond. She is the founding donor of the Flint Child Health and Development Fund (flintkids.org).

With concentrations in environmental health and health policy, Dr. Hanna-Attisha received her bachelor's degree and Master of Public Health degree from the University of Michigan. She completed her medical degree from Michigan State University College of Human Medicine and her residency at Children's Hospital of Michigan in Detroit, where she was chief resident. She is currently a Charles Stewart Mott Endowed Professor of Public Health and an associate professor of pediatrics and human development at Michigan State University College of Human Medicine.

- ◆ Engineer, Designer, Entrepreneur, Investor, Mentor, and Author
- ◆ Considered "The Father of the iPod" and Co-Creator of the iPhone. Co-Founded Nest Thermostat
- ◆ Fadell has authored more than 300 patents and was named one of Time's "100 Most Influential People in the World" in 2014
- ◆ One of the Most Important Figures in Apple's History

"What you're building never matters as much as who you're building it with."

***"Failure is when
you quit. But when
you learn from it,
and you use it as a
tool to progress,
that's when it
becomes
powerful."***

- Tony Fadell

***"Learn by doing. Learn through experiences.
... the way you open up your knowledge of the world is by discovering it and learning about it, not through books, but by being there."***

- Tony Fadell

***"Learning by doing
is the only way I
know how to
learn."***

- Tony Fadell

***"We need to spend
more time on
fixing the climate
than we need to
worry about
getting into the
metaverse,"***

- Tony Fadell

Tony Fadell

Anthony Michael Fadell was born in Michigan, to a Lebanese-American father and a Polish-American mother. His father was a sales executive with the Levi Strauss company and the family moved frequently when Tony Fadell was growing up. Grosse Pointe, Michigan was the community the Fadell family most often returned to, and Tony Fadell graduated from Grosse Pointe South High School. His maternal grandfather, a teacher and school superintendent, was an inveterate tinkerer and taught Tony to use tools, build things and repair machinery. Tony discovered computers at age 12 and caddied at a local golf club to raise money to buy his first Apple II. In high school, he perused MacWorld and the other computer magazines and dreamed of working with the team responsible for creating Apple's Macintosh computer. He studied computer engineering at the University of Michigan and as an undergraduate built a small business, Constructive Instruments, producing multimedia composition software for children.

After college, Fadell joined Apple spinoff General Magic in 1992, working with Sony, Philips, Matsushita, Toshiba and other consumer electronics firms in the "General Magic Alliance" to develop a line of personal handheld communicators. In 1995, Fadell was hired by Philips Electronics where he co-founded their Mobile Computing Group and served as the Chief Technology Officer, and Director of Engineering. In July 1999, Fadell started his own company called Fuse to develop the "Dell of the Consumer Electronics". One of the devices he had in mind was a small hard disk-based music player and an online-store-for-music. Fuse failed, however, to find a second round of funding, and Fadell started exploring developing the product at other companies.

After first meeting Apple Computer in January 2001, Fadell became a contractor by February, developing Apple's audio product strategy and designing what would become the iPod under the code name "P68 Dulcimer". His idea for a small hard disk-based music player and an online-store-for-music had caught Steve Jobs's attention. During that time, he developed the concept and initial design of the iPod. He was then hired by Apple to assemble and run its iPod & Special Projects group in April 2001. He was tasked with overseeing the design and production of the iPod and iSight devices. He was promoted to vice president of iPod engineering in 2004 and oversaw iPod hardware, software, and accessories development. On October 14, 2005, Apple announced that Fadell would replace the retiring Jon Rubinstein as Senior Vice President of the iPod Division on March 31, 2006. Fadell began working in secret with a team to develop the iPhone. From March 2006 to November 2008, he oversaw iPhone hardware, firmware, and accessories development for the first three generations of the product line. On November 3, 2008, The Wall Street Journal broke the story of Fadell's departure from Apple.

While building an energy-efficient home near Lake Tahoe in California, Fadell searched for a thermostat and found available devices to be expensive with lack of features and energy efficiency gains. After having left Apple, he spent time around the world observing others having similar energy-saving dilemmas. Fadell developed the business plan to redesign the traditional thermostat while living in Paris. In May 2010, Fadell co-founded Nest Labs in Palo Alto, California with Matt Rogers, a former Apple colleague. The company designed and manufactured the Nest Learning Thermostat, a sensor-driven and programmable Wi-Fi-enabled device.

Fadell created Future Shape, a global investment and advisory firm coaching engineers and scientists. The firm has invested in over 200 startups and is now part of Build Collective.

He recently authored "Build".

Dr. Farouk El-Baz

- ◆ Egyptian American Space Scientist, Geologist, and Research Professor
- ◆ Key Scientist Who Helped NASA Identify the Landing Sites for the Appollo 11 Moon Landing
- ◆ Established the Center for Earth and Planetary Studies at the National Air and Space Museum
- ◆ Clear-Water Advocate, and Leading Expert in the Study of Deserts and How to Find and Sustain Water

Before Neil Armstrong landed on the moon, Dr. Farouk El-Baz decided where he should land.

***"She said, "And
what do you know
about the Moon?" I
said, "Nothing, but
I can learn."***

-Dr. Farouk El-Baz

***"It was knowledge.
And it was work like
hell, figure out
everything yourself
before you open your
mouth, then when you
open your mouth
make sure that you're
going to add
something"***

-Dr. Farouk El-Baz

***"We were not taken by
the enormity of the
event at the time,
because we were too
heavily involved and too
thoroughly obsessed by
the details of how do
we do it and how do we
do it right, so we never
really reflected at the
time."***

-Dr. Farouk El-Baz

***"Encouraging
excellence, and
rewarding
innovation,
increases the
potential of a
nation."***

-Dr. Farouk El-Baz

***"Not every
discovery has been
announced."***

-Dr. Farouk El-Baz

***"Competition in
itself encourages
creativity and
creativity is the
basis of
knowledge."***

-Dr. Farouk El-Baz

***"As our closest
celestial body, the
Moon has been on the
mind of man from time
immemorial...it is the
nature of human
beings that we
investigate what we
see no matter how far
removed from us."***

-Dr. Farouk El-Baz

***"There is nothing
so far removed
from us to be
beyond our reach,
or so far hidden
that we cannot
discover it."***

-Dr. Farouk El-Baz

"We study the composition of the planets to better understand our own Earth and its geologic history. Study the composition of the planets to better understand our own Earth and its geologic history."

-Dr. Farouk El-Baz

Dr. Farouk El-Baz

Hailing from a small Egyptian town in the Nile Delta, Farouk El-Baz credits his sense of curiosity and fascination with the physical world to his father's dedication to teach his wife and their nine children to read and write. El-Baz has paired his powerful imagination with a deep knowledge of the sciences, helping transport humankind to its furthest reaches and provide new access to such life-giving forces as water and education.

In his late 20s, El-Baz helped choose landing sites for the first manned mission to the moon, Apollo 11. In the early 1970s, he helped establish and direct the Center for Earth and Planetary Studies at the National Air and Space Museum at the Smithsonian Institution - and later helped pioneer the use of IMAX movies.

Until his retirement in May 2018, El-Baz served as the director of Boston University's Center for Remote Sensing, a NASA-recognized "Center of Excellence" that studies earth's environment, using technology created for space exploration - including in the search for groundwater sources in some of the world's driest places.

A geologist and clear-water advocate, El-Baz has advised leaders all around the globe and especially on the African continent on how they can work together to decrease their people's dependence on strained water sources while opening up new sources to relieve suffering populations (such as cooperating to raise water hidden underground in conflict-torn Darfur).

He is the recipient of numerous honors and awards, including the Golden Door Award of the International Institute of Boston, the Pioneer Award of the Arab Thought Foundation, and many more.

His scientific and historic achievements have not escaped the notice of popular culture, including a portrayal of El-Baz training NASA astronauts in the Tom Hanks-produced HBO series *From the Earth to the Moon*, and a spaceship that bore his name in *Star Trek: The Next Generation*.

Rashida Tlaib

- ◆ **American Politician and Lawyer, Currently Serving as Congresswoman for Michigan's 13th Congressional District**
- ◆ **First Palestinian-American Woman to be Elected to Congress, First Muslim Woman to Serve in the Michigan Legislature, and One of the First Two Muslim Women to Serve in U.S. Congress**

“When I think of immigration, I want to think of families. I want to think of unity. I want to think of a safe place, you know, free of persecution, a place where we can welcome a child that is hungry.”

"As a responsible parent who continues to reflect and read the criticisms of my actions, I think of my two boys and I remind myself: silence is not an option and it never should be."

-Rashida Tlaib

"When we shift our public dollars away from our schools and city services and into company developments, it increases the root causes of poverty: unemployment, underemployment, lack of community resources, and lack of quality public education."

-Rashida Tlaib

***"My mother knows
struggle and has
taught me how to lead
with compassion, the
compassion that
should be required for
every representative on
every level of
government."***

-Rashida Tlaib

"We must stop tax giveaways to rich corporations and developers while our schools are crumbling and people are losing their homes."

-Rashida Tlaib

***"When I think of
immigration, I want to
think of families. I want
to think of unity. I want
to think of a safe place,
you know, free of
persecution, a place
where we can welcome
a child that is hungry."***

-Rashida Tlaib

***"I'm constantly
working, and I've
earned everything
that I've been able
to achieve on my
own, and that's
what being the
eldest of 14 taught
me."***

-Rashida Tlaib

***"I'm very proud to
be of Muslim faith."***

-Rashida Tlaib

Rashida Tlaib

Rashida Tlaib is a well-known progressive warrior and, in her own words, “a mother working for justice for all.” Her two young sons are at the root of her unwavering passion to help change lives for the better. She is the oldest of 14 children, born and raised in Detroit, the proud daughter of Palestinian immigrant parents.

Rashida made history in 2008 by becoming the first Muslim woman to ever serve in the Michigan Legislature. She is beloved by residents for the transformative constituent services she provided, and for successfully fighting the billionaires and corporations that tried to pollute her district. When families get to know Rashida, they have no doubt that she will work tirelessly to knock down barriers for real change, and whether by policy or action, she will roll up her sleeves to make sure her residents are cared for, no matter how big the challenge.

When billionaire slumlord Matty Moroun refused to follow the law and get polluting semi-trucks off neighborhood streets, Rashida organized residents with the We Have A Right To Breathe campaign and forced Moroun to fulfill his obligations to protecting public health. When large piles of black dust started showing up on the Detroit riverfront and blowing into homes and parks, and the Michigan Department of Environmental Quality told residents everything was fine, Rashida collected samples and got the substance tested herself - exposing the cancer-causing “petroleum coke” as a threat, and getting it removed.

As an attorney at the Sugar Law Center for Economic and Social Justice, Rashida took the movement to the courts, fighting racist emergency managers, abusive state agencies, and leading the fight for community benefits agreements that promote equitable development. Rashida knows that effective advocacy requires an all-out approach, fighting in the community, in the legislature, and in the courts every day against injustice and inequality, so that every single person in this country has a chance to thrive.

She is currently the Congresswoman for Michigan’s 13th Congressional District, which includes the city of Detroit and surrounding communities.

Linda Sarsour

- ◆ **Author, Award-Winning Racial and Civil Rights Activist, Community Organizer, and Mother of Three**
- ◆ **Palestinian Muslim American**
- ◆ **Most Well-Known for Organizing the 2017 Women's March in Washington**

“Alleviating suffering of the most marginalized communities must begin with assessing the needs of entire communities and allowing the most marginalized to lead the strategy. My belief is those closest to the pain are closest to the solution.”

***"We must stand
together united in
solidarity against
the targeting,
demonization,
and vilification of
any group of
people."***

-Linda Sarsour

"I will not walk away from the people and communities whom I love deeply. I will continue to raise my voice for justice and equality for all, organize communities who want to defend the rights of Black people, stand against policies that target and marginalize Muslims, and advocate for health care for all people."

-Linda Sarsour

***"My work has
always been
rooted in
nonviolence, as
espoused by the
Rev. Martin Luther
King Jr."***

-Linda Sarsour

***"I care about
affordable housing. I
care about bus routes.
I care about small
businesses. I care
about schools. These
are not Muslim issues.
Even protection of civil
rights - that's not just
a Muslim issue. That is
for everyone."***

-Linda Sarsour

***"It is powerful to
know what it
feels like to be in
community with
people who will
show up and
fight for each
other."***

-Linda Sarsour

"When you talk about feminism, you're talking about the rights of all women and their families to live in dignity, peace, and security. It's about giving women access to health care and other basic rights."

-Linda Sarsour

Linda Sarsour

Born and raised in Brooklyn, Linda Sarsour grew up embracing the identity of her local community as well as that of her Palestinian ancestry. She recalls with fondness the memories of summers in her homeland with extended family, as well as the kinship and connectedness she felt with all of the “brown, Black and beige kids” in her neighborhood and school. She has grown up to be unapologetically an Arab American New Yorker, as well as unapologetically outspoken and tenacious, a protector and a fighter.

As a Muslim American living through and post 9/11, Linda witnessed firsthand how Muslims were unfairly branded and targeted by the government, by news outlets, and by their own neighbors. It was in this setting, just a few years after she graduated school that she began working for her father’s cousin, Basemah, at the Arab American Association of New York. Linda credits this woman with teaching her how to serve and love those in their community, while at the same time standing up to the injustices that were occurring. She has worked ever since to combat racism, bigotry, and xenophobia for all marginalized groups in the US.

Though Linda has been involved in many political movements, she may be most well-known for organizing the 2017 Women’s March in Washington, the largest single day protest ever recorded in the US. That year, she was recognized, along with her two co-chairs, as Time Magazine’s “100 Most Influential People”. The same organizers also led the “March2Justice”, a 250-mile walk to fight profiling and brutality by the police among other issues. Linda believes that rights are not just for “her people”, but that we all must show up for each other.

She served for several years as the Executive Director of the Arab American Association in NYC, where her work began. She has also since founded MPower Change which is a grassroots, Muslim-led, social justice organization and Until Freedom, a group of professionals committed to organizing and fighting injustice. She has served on several boards, won awards for her work, and had audiences with many of the highest decision makers including presidents, politicians, and religious leaders.

Salma Hayek

- ◆ Award Winning Actress and Producer, and Former Model
- ◆ Philanthropist, Humanitarian, and Women's Rights Activist
- ◆ Produced and Starred in Her Dream Role of Frida Kahlo, was Nominated for Six Academy Awards
- ◆ Named one of 100 Most Influential People in the World by TIME in 2023

“What is important is to believe in something so strongly that you're never discouraged.”

***"Life is tough:
and if you have
the ability to
laugh at it, you
have the ability
to enjoy it."***

-Salma Hayek

***"What is
important is to
believe in
something so
strongly you're
never
discouraged."***

-Salma Hayek

***"Praise yourself
for what you
have achieved
and never get
despaired."***

-Salma Hayek

***"When you make
a mistake, have
faith that there's
always a way
out."***

-Salma Hayek

Salma Hayek

Salma Hayek was born on September 2, 1966 in Coatzacoalcas, Mexico. Her father is of Lebanese descent and her mother is of Mexican/Spanish ancestry. After having seen *Willy Wonka & the Chocolate Factory* (1971) in a local movie theater, she decided she wanted to become an actress. At age 12, she was sent to the Academy of the Sacred Heart in New Orleans, Louisiana. She attending Mexico City's prestigious university Universidad Iberoamericana and studied International Relations and Drama. After she graduated, she felt ready to pursue acting seriously.

A daughter of Mexican and Lebanese parents, Salma Hayek grew up with a strong connection to her Arab roots. Though she was born in Veracruz Mexico, she says she “probably ate Kibbeh (a popular Lebanese dish) before tacos”.

Well known for being an actress, producer, and philanthropist, she’s also been an advocate for change toward a more understanding and accepting world. She has made a significant contribution to a wider acceptance not only of ethnic diversity on screen, but of women in roles traditionally held by men in the industry.

Hayek started fighting for women's rights at the age of 25 and in 2005, she testified before the U.S. Senate in support of reauthorizing the Violence Against Women Act. She has donated to many anti-domestic violence groups and shelters.

In 2013, Hayek co-founded Chime for Change, which aims to spread female empowerment. The goal was to target global issues of education, health, and justice for girls and women— because every girl has a right to education, health, and justice.

Hayek has traveled and partnered with UNICEF, doing work in Sierra Leone, and has been a longtime supporter of Pro Mujer, which offers microfinancing to women in Latin America. In 2023, Hayek was named in TIME’s list of the 100 Most Influential People in the World.

***"Be the best you
that you can be.
Don't let anyone
define you. Only
you get to define
you."***

-Maysoon Zayid

Maysoon Zayid

Renowned comedian, actress, writer, and disability advocate Maysoon Zayid jokes that if there were a competition called the Oppression Olympics, she would win gold. "I'm Palestinian, Muslim, I'm a woman of color, I'm disabled," Zayid tells audiences, "and I live in New Jersey." Hilarious, disarming, and with a message that matters, Zayid's comedy and commentary resonate with audiences worldwide. She is the co-founder/co-executive producer of the New York Arab American Comedy Festival and The Muslim Funny Fest, and her famed TED Talk, "I got 99 problems... palsy is just one" has over 10 million views. As Zayid states in the talk's intro: "I have cerebral palsy, which means I shake all the time. Look. It's exhausting. I'm like Shakira meets Muhammad Ali."

Hailed in Glamour as "the most fearless comic alive," Zayid has performed around the world, and headlined both the Arabs Gone Wild Comedy Tour and The Muslims Are Coming Tour, in which comedians toured the U.S. in an effort to counter Islamophobia. Zayid is also a disability advocate who fights to mainstream disabled students worldwide and for disability rights. Her bestselling memoir Find Another Dream chronicles her life story in finding her voice and own path to stardom.

She is a graduate of and a Guest Comedian in Residence at Arizona State University. She was a full-time On Air Contributor to Countdown with Keith Olbermann and a columnist for The Daily Beast. She has most recently appeared on Oprah Winfrey Networks In Deep Shift, 60 Minutes, and ABC News. Maysoon had the most viewed TED Talk of 2014 and was named 1 of 100 Women of 2015 by BBC.

Maysoon is a Princeton University Arts Fellow for 2021-23 and will begin two years of teaching and community collaboration in September.

Zayid's candid, inspiring, and laugh-out-loud funny talks cover topics ranging from beating the odds, to fostering inclusivity and battling discrimination, to the challenges facing the disability community.

Dr. Fady Joudah

- ◆ **Palestinian American Physician, Poet, and Translator**
- ◆ **Volunteered in Zambia and Sudan with Doctors Without Borders**
- ◆ **2007 Winner of the Yale Series of Younger Poets Competition for His Debut Collection of Poetry "The Earth in the Attic"**

"As a young boy, I remember feeling I needed to become a doctor because the world or my immediate family needed compassion and support."

***"For me, poetry is
a form of
activism."***

-Dr. Fady Joudah

Dr. Fady Joudah

Fady Joudah is a Palestinian American physician, poet, and translator. He was born in Austin, Texas, and grew up in Libya and Saudi Arabia. He was educated at the University of Georgia, the Medical College of Georgia, and the University of Texas Health Sciences in Houston. In 2002 and 2005 he worked with Doctors Without Borders in Zambia and Sudan, respectively.

Joudah's debut collection of poetry, *The Earth in the Attic* (2008), won the 2007 Yale Series of Younger Poets competition, chosen by Louise Glück. Joudah followed his second book of poetry, *Alight* (2013) with *Textu* (2014), a collection of poems written on a cell phone wherein each piece is exactly 160 characters long. His fourth collection is *Footnotes in the Order of Disappearance* (2018). In 2014, Joudah was a Guggenheim Fellow in poetry.

As critic Charles Bainbridge observed in a 2008 Guardian review of *The Earth in the Attic*, "Joudah's poetry thrives on dramatic shifts in perspective, on continually challenging received notions."

Joudah translated several collections of Palestinian poet Mahmoud Darwish's work in *The Butterfly's Burden* (2006), which won the Banipal prize from the UK and was a finalist for the PEN Award for Poetry in Translation; and in *If I Were Another*, which won a PEN USA award in 2010. His translation of Ghassan Zaqtan's *Like a Straw Bird It Follows Me* (2012) won the Griffin International Poetry Prize in 2013. His other translations include Amjad Nasser's *Petra: The Concealed Rose* and *A Map of Signs and Scents*.

Joudah lives with his family in Houston, where he works as a physician of internal medicine.
